

ANCHORLIFT™

BOW ROLLER SELECTION GUIDE, WHAT ANCHOR FITS WHICH BOW ROLLER?

Anchorlift offers two styles of Bow Rollers that work with all types of anchors available today:

Anchorlift™ Fixed Roller, Self-Launching Bow Roller with dual rollers for Boats 20ft. to 100ft. and

Anchorlift™ Pivoting Head, Self-Launching Bow Roller for Boats 20ft. to 100ft.

It is important to match your anchor with the correct bow roller for maximum performance and usability.

Fixed Roller, Self-Launching Bow Rollers are designed for use with all modern plow style anchors that are made in one piece such as the Anchorlift TPX, Rocna, Rocna Vulcan, Ultra, Manson Supreme, Mantus, Lewmar Delta, and Anchorlift XR anchors. Fixed Roller, Self-Launching Bow Rollers can also fit Fortress and Guardian anchors by removing the top roller and moving the front roller to the center position.

Pivoting Head, Self-Launching Bow Rollers are designed for use with Claw type anchors also known as Bruce style and Rocna style anchors.

Follow the GUIDE below for correct selection:
